

6516207023.txt

I oppose the National Association of Broadcasters petition 04-160. I respectfully request and urge the FCC to reject this petition and SUPPORT satellite radio's ability to bring local traffic and weather to its customers.

Satellite radio offers static free listening, targets music, news and sports to the customer's wishes and delivers a wide range of services that can not be matched by any AM/FM delivery method. I have been a loyal XM radio fan for two years and look forward to continuing to receive the content I wish.

HOW DARE the NAB decide what I am permitted to hear! I pay for the XM radio services, because they give me the services that I can not get elsewhere. PLEASE REJECT Petition 04-160 by the NAB. They have not kept pace with the current technology and have not responded to their customers.

America is built on the free enterprise system. XM is a shining example of this. PLEASE REJECT PETITION 04-160.

Respectfully submitted,

Stacey Ross
